

S100a4-Flox

Nomenclature	C57BL/6Smoc- <i>S100a4</i> ^{em(flox)/Smoc}
Cat. NO.	NM-CKO-220530
Strain State	Repository Live

Gene Summary

Gene Symbol S100a4	Synonyms	42a, 18A2, Capl, FSp1, Mts1, pk9a, PeL98, metastasin
	NCBI ID	20198
	MGI ID	1330282
	Ensembl ID	ENSMUSG00000001020
	Human Ortholog	S100A4

Model Description

These mice carry loxP sites flanking exon 2-3 of S100a4. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of S100a4 gene.

*Literature published using this strain should indicate: S100a4-Flox mice (Cat. NO. NM-CKO-220530) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
