	Ensembl ID	ENSMUSG00000062515
	Human Ortholog	FABP4

Model Description

These mice carry loxP sites flanking exon 2-3 of *Fabp4*. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Fabp4* gene.

*Literature published using this strain should indicate: *Fabp4*-Flox mice (Cat. NO. NM-CKO-220442) were purchased from Shanghai Model Organisms Center, Inc..
