

H2-D1-Flox

Nomenclature	C57BL/6Smoc- <i>H2-D1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol H2-D1	Synonyms	H-2D, H2-D, H2-K1
	NCBI ID	14964
	MGI ID	95896
	Ensembl ID	ENSMUSG00000073411
	Human Ortholog	HLA-A, HLA-B, HLA-C

Model Description

These mice carry loxP sites flanking target exons of H2-D1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of H2-D1 gene.

*Literature published using this strain should indicate: H2-D1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
