

Ifng-Flox

| | |
|---------------------|---|
| Nomenclature | C57BL/6Smoc- <i>Ifng</i> ^{em(flox)/Smoc} |
| Cat. NO. | NM-CKO-220246 |
| Strain State | Sperm cryopreservation |

Gene Summary

| | | |
|----------------------------|-----------------------|------------------------------------|
| Gene Symbol Ifng | Synonyms | lfg; IFN-g |
| | NCBI ID | 15978 |
| | MGI ID | 107656 |
| | Ensembl ID | ENSMUSG00000055170 |
| | Human Ortholog | IFNG |

Model Description

These mice carry loxP sites flanking exon1-3 of *Ifng*. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Ifng* gene.

*Literature published using this strain should indicate: *Ifng*-Flox mice (Cat. NO. NM-CKO-220246) were purchased from Shanghai Model Organisms Center, Inc..
