

Sst-Flox

Nomenclature	C57BL/6Smoc- <i>Sst</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Sst	Synonyms	SS, SOM, SRIF, Smst
	NCBI ID	20604
	MGI ID	98326
	Ensembl ID	ENSMUSG00000004366
	Human Ortholog	SST

Model Description

These mice carry loxP sites flanking target exons of *Sst* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Sst* gene.

*Literature published using this strain should indicate: Sst-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
