

G6pc2-Flox

Nomenclature	C57BL/6Smoc- <i>G6pc2</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol G6pc2	Synonyms	IGRP, G6pc-rs
	NCBI ID	14378
	MGI ID	1277193
	Ensembl ID	ENSMUSG00000005232
	Human Ortholog	G6PC2

Model Description

These mice carry loxP sites flanking target exons of G6pc2 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of G6pc2 gene.

*Literature published using this strain should indicate: G6pc2-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
