

SiglecF-Flox

Nomenclature	C57BL/6Smoc- <i>SiglecF</i> ^{em1(flox)Smoc}
Cat. NO.	NM-CKO-2115280
Strain State	Sperm cryopreservation

Gene Summary

Gene Symbol SiglecF	Synonyms	Siglec5; mSiglec-F
	NCBI ID	233186
	MGI ID	2681107
	Ensembl ID	ENSMUSG00000039013
	Human Ortholog	SIGLECF

Model Description

These mice carry loxP sites flanking exon 6-9 of SiglecF gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of SiglecF gene.

*Literature published using this strain should indicate: SiglecF-Flox mice (Cat. NO. NM-CKO-2115280) were purchased from Shanghai Model Organisms Center, Inc..
