

Engase-Flox

Nomenclature	C57BL/6Smoc- <i>Engase</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Engase	Synonyms	C130099A03, D230014K01Rik
	NCBI ID	217364
	MGI ID	2443788
	Ensembl ID	ENSMUSG00000033857
	Human Ortholog	ENGASE

Model Description

These mice carry loxP sites flanking target exons of Engase gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Engase gene.

*Literature published using this strain should indicate: Engase-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
