

Myl10-Flox

Nomenclature	C57BL/6Smoc- <i>Myl10</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Myl10	Synonyms	PLRLC, Mylc2pl, 1700027I08Rik
	NCBI ID	59310
	MGI ID	1891705
	Ensembl ID	ENSMUSG000000005474
	Human Ortholog	MYL10

Model Description

These mice carry loxP sites flanking target exons of Myl10 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Myl10 gene.

*Literature published using this strain should indicate: Myl10-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
