

Aadat-Flox

Nomenclature	C57BL/6Smoc- <i>Aadat</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Aadat	Synonyms	Aadt, Kat2, KATII, Kyat2, mKat-2, A1875679
	NCBI ID	23923
	MGI ID	1345167
	Ensembl ID	ENSMUSG00000057228
	Human Ortholog	AADAT

Model Description

These mice carry loxP sites flanking target exons of Aadat gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Aadat gene.

*Literature published using this strain should indicate: Aadat-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
