

Pkd2l1-Flox

Nomenclature	C57BL/6Smoc- <i>Pkd2l1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Pkd2l1	Synonyms	PCL, Pkdl, PKD2L, TRPP3, BC046386, B830002B15
	NCBI ID	329064
	MGI ID	1352448
	Ensembl ID	ENSMUSG00000037578
	Human Ortholog	PKD2L1

Model Description

These mice carry loxP sites flanking target exons of Pkd2l1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Pkd2l1 gene.

*Literature published using this strain should indicate: Pkd2l1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
