	Ensembl ID	ENSMUSG00000041798
	Human Ortholog	GCK

Model Description

These strains carry loxP sites flanking exon 5-6 of Gck gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Gck gene.

*Literature published using this strain should indicate: Gck-Flox mice (Cat. NO. NM-CKO-241082) were purchased from Shanghai Model Organisms Center, Inc..
