

Med12-Flox

Nomenclature	C57BL/6Smoc- <i>Med12</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Med12	Synonyms	Mopa, OPA-1, 230kDa, Tnrc11, Trap230
	NCBI ID	59024
	MGI ID	1926212
	Ensembl ID	ENSMUSG00000079487
	Human Ortholog	MED12

Model Description

These mice carry loxP sites flanking target exons of Med12 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Med12 gene.

*Literature published using this strain should indicate: Med12-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
