

Osr2-Flox

Nomenclature	C57BL/6Smoc- <i>Osr2</i> ^{em(flox)/Smoc}
Cat. NO.	NM-CKO-220366
Strain State	Sperm cryopreservation

Gene Summary

Gene Symbol Osr2	Synonyms	Osr2A; Osr2B; 5430409I15Rik
	NCBI ID	107587
	MGI ID	1930813
	Ensembl ID	ENSMUSG00000022330
	Human Ortholog	OSR2

Model Description

These mice carry loxP sites flanking exon 2-3 of *Osr2*. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Osr2* gene.

*Literature published using this strain should indicate: *Osr2*-Flox mice (Cat. NO. NM-CKO-220366) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
