

Msx1-Flox

Nomenclature	C57BL/6Smoc- <i>Msx1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Msx1	Synonyms	msh, Hox7, Hox-7, Hox7.1, AA675338, AI324650
	NCBI ID	17701
	MGI ID	97168
	Ensembl ID	ENSMUSG00000048450
	Human Ortholog	MSX1

Model Description

These mice carry loxP sites flanking target exons of Msx1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Msx1 gene.

*Literature published using this strain should indicate: Msx1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
