

Ahctf1-Flox

Nomenclature	C57BL/6Smoc- <i>Ahctf1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Ahctf1	Synonyms	Elys, AV011447, 6230412P20Rik
	NCBI ID	226747
	MGI ID	1915033
	Ensembl ID	ENSMUSG00000026491
	Human Ortholog	AHCTF1

Model Description

These mice carry loxP sites flanking target exons of Ahctf1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Ahctf1 gene.

*Literature published using this strain should indicate: Ahctf1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
