

# HCC-95

## Strain Information

Cat. NO. NM-F22

Cell Line HCC-95

Strain State Validation of tumorigenic capacity completed

Model Description HCC-95 is a human non-small cell lung cancer (NSCLC), squamous cell carcinoma cell line.

\*Literature published using this strain should indicate: HCC-95 cell line (Cat. NO. NM-F22) was purchased from Shanghai Model Organisms Center, Inc..

## Validation Data

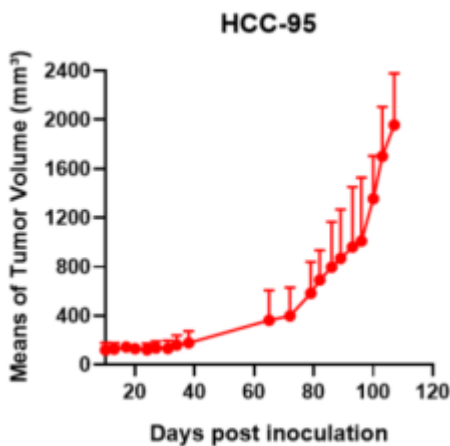

Figure 1. Tumor growth curve of HCC-95 xenograft model (n=5)

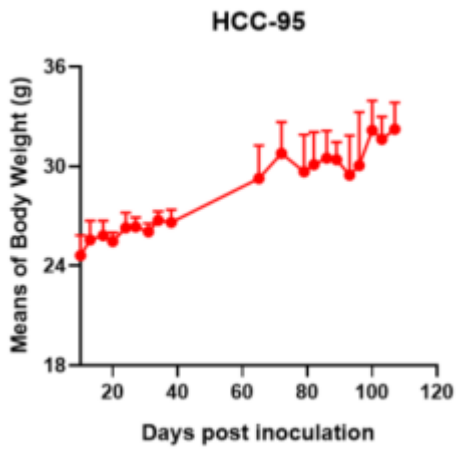

Figure 2. Body weight change of HCC-95 xenograft model (n=5)

\*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
