

BxPC-3

Strain Information

Cat. NO.	NM-Y05
Cell Line	BxPC-3
Strain State	Validation of tumorigenic capacity completed
Model Description	BxPC-3 is a cell line exhibiting epithelial morphology that was isolated from the pancreas tissue of a 61-year-old, female patient with adenocarcinoma.
	*Literature published using this strain should indicate: BxPC-3 cell line (Cat. NO. NM-Y05) was purchased from Shanghai Model Organisms Center, Inc..

Validation Data

A

B

Fig1. Analysis of Tumorigenesis in M-NSG mice (n=4) . a Tumor volume was measured by time. b Body weight was simultaneously checked.

*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
