

Crh-Flox

Nomenclature	C57BL/6Smoc- <i>Crh</i> ^{em1(flox)Smoc}
Cat. NO.	NM-CKO-200089
Strain State	Sperm cryopreservation

Gene Summary

Gene Symbol Crh	Synonyms	CRF; Gm1347
	NCBI ID	12918
	MGI ID	88496
	Ensembl ID	ENSMUSG00000049796
	Human Ortholog	CRH

Model Description

These mice carry loxP sites flanking exon 2 of *Crh* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Crh* gene.

Research Application: Signal transduction and circadian rhythm related gene related research through GPCR

*Literature published using this strain should indicate: Crh-Flox mice (Cat. NO. NM-CKO-200089) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
