

Itgav-Flox

Nomenclature	C57BL/6Smoc- <i>Itgav</i> ^{em1(flox)Smoc}
Cat. NO.	NM-CKO-200110
Strain State	Repository Live

Gene Summary

Gene Symbol Itgav	Synonyms	CD51; 1110004F14Rik; 2610028E01Rik; D430040G12Rik
	NCBI ID	16410
	MGI ID	96608
	Ensembl ID	ENSMUSG00000027087
	Human Ortholog	ITGAV

Model Description

These mice carry loxP sites flanking exon 4 of Itgav gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Itgav gene.

Research Application: Research on Innate Immune System and ERK Signal Transduction

*Literature published using this strain should indicate: Itgav-Flox mice (Cat. NO. NM-CKO-200110) were purchased from Shanghai Model Organisms Center, Inc..
